SUMMARY

- Launched a F2P mobile game from zero to 50K+ downloads in 5 months and nearly doubled D1 retention (10% to 18%) within two months through rapid core loop iteration.
- Caught a \$20K revenue exposure mid-live event through proactive impact analysis of prize configurations, neutralized before it reached players.
- Shipped 3 games in 6 months as sole PM.
- Built a CSV batch automation that cut manual ops time 45x (15 min to 20 sec), adopted teamwide.
- Built 11 years of gaming experience across 6.5 years in engineering and 4.5 years in product management, read code, owned root cause analysis, and bridged product and engineering without handoffs.

WORK EXPERIENCE

Product Manager | JetSynthesys (Game Development Services Company) | 09/2025 - Present

- Owned end-to-end LiveOps for two consecutive seasons, managing 10 production deployments, 6 LTBs, 4 Trading Posts, and full Legendary, Mythic, Rider, and Atlas branch suites on iOS and Android.
- Caught a \$20,000 revenue exposure mid-live-event through proactive impact analysis of Tower Instance configurations during a Fortification event prize programme, neutralized before it reached players.
- Resolved a monetization-critical gacha defect (missing Festive Dragon shards from Draconic Chests) affecting IAP chest revenue, root cause identified and deployed to production without escalation.
- Vibecoded a CSV batch automation delivering a 45x reduction in manual processing time (15 min to 20 sec) adopted teamwide.
- Conducted structured impact analysis on a proposed XP Booster feature, identified unmitigable player progression risks and recommended against implementation, preventing a disruptive release from entering the development pipeline.

Product Manager | Blkbox AI (Creative Intelligence for Mobile Games) | 02/2024 - 04/2025

- Built and led a cross-functional team from scratch, recruited a developer, artist, and game designer to develop a Free-to-Play gate runner mobile game.
- Shipped from greenlight to soft launch in 5 months across iOS and Android; reached 50,000 installs with a \$0.80 CPI.
- Improved player D1 retention from 10% to 18% within two months by refining game controls and enhancing level design.
- Analyzed and optimized core loop and level design, increasing level completion rates by 7%.

Product Manager | AURA (Web3, Gaming NFT Marketplace) | 05/2023 - 11/2023

- Shipped Creator Profile feature enabling user-generated NFT collections; improved featured games CTR by 5% and user engagement time by 7% through UX optimization.
- Implemented the sprint system and streamlined the Jira workflow, improving the tech team's delivery cadence.

Product Manager | FanClash (RMG, Esports Fantasy) | 04/2022 - 04/2023

- Led cross-functional pod of 10+ members across design, engineering, and marketing.
- Revamped team creation flow, increasing conversion rate by 5%.
- Developed and launched Fantasy With EStars in partnership with esports teams, achieving a 90% fill rate.
- Improved booster engagement by 10% through user research and UX iteration.
- Increased adoption of Expert Opinion and Player Stats features by 15% through funnel analysis and entry point repositioning.

Game Product Manager | Playshifu (EdTech, STEM-based AR Toys) | 06/2021 - 03/2022

- Owned full product/game lifecycle as sole PM, shipped 3 games in 6 months across design, art, and engineering.
- Diagnosed dropoffs in Tacto Electronics Game using Mixpanel funnel analysis; increased level completion rate by 5%.
- Built a Mixpanel dashboard with funnel tracking for dropoff analysis and iteration strategy.
- Created PRDs for Plugo Animals game features, ensuring cross-functional alignment.

Senior Software Engineer | SplashLearn (EdTech, App-based Learning) | 07/2019 - 06/2021

- Designed, developed, and launched English games on Android, iOS, and Web.
- Drove a 60% increase in engagement with the English Curriculum across multiple platforms.
- Implemented the MathFacts feature, enhancing user experience and learning outcomes.

Software Engineer | Suventure Services Pvt Ltd. (Service-based, Finland-based Client) | 07/2018 - 07/2019

- Built features for an indoor cycle training application.
- Contributed to the Bluetooth connectivity feature, improving user experience.
- Developed the Nearby Players List, increasing user engagement by 5%.

Game Developer | Nukebox Studios (F2P, Mobile Games Studio) | 12/2014 - 06/2018

- Designed and developed architecture for Editor's Choice Game: Food Truck Chef.
- Led development of Food Truck Chef on Facebook GameRoom.
- Drove game improvements through player feedback analysis and competitive analysis.

EDUCATION

- Product Management Certification Upgrad (Duke CE Partnership) | 05/2020 - 11/2020
- Diploma in Game Programming, Asian Institute of Gaming and Animation | 05/2014 - 12/2014
- B.Tech in Electronics and Communication Engineering, Amity School of Engineering and Technology | 05/2010 - 04/2014
