

Product Teardown of Rodeo Stampede

Rodeo Stampede's IAP and Ad Monetization will be analyzed to make recommendations on how to optimize it.

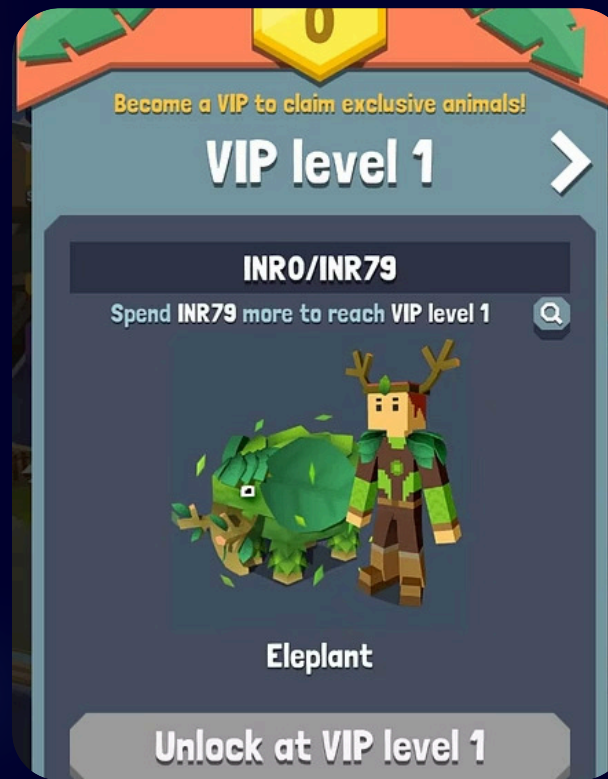

by Rahul Ohri

Rodeo Stampede's IAP Model

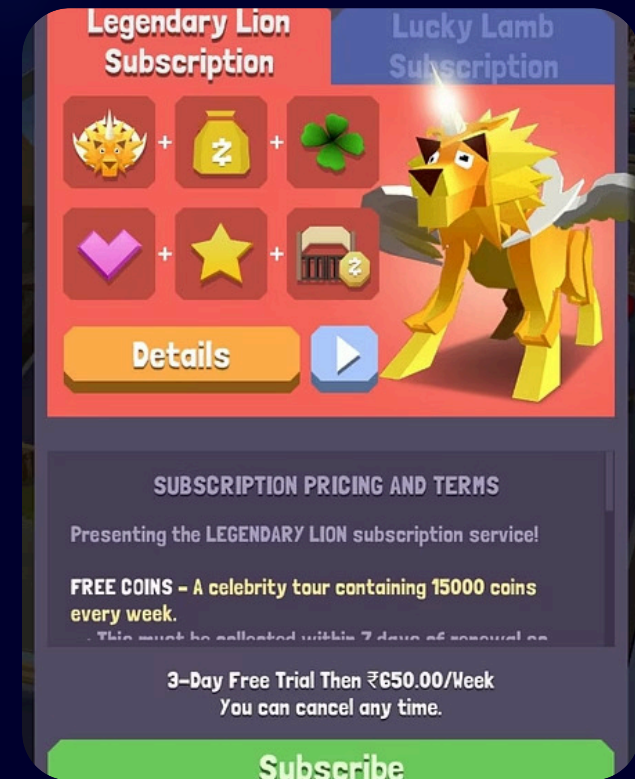

Various IAP Options

Rodeo Stampede offers a variety of in-app purchase options, including coin bundles, map unlocks, animal combos, and energy.

VIP Status

The VIP status offers exclusive animals with extra abilities based on the amount of money spent, increasing the LTV of users.

Subscription Models

There are two subscription models available for a 3-day trial, allowing gamers to try out the benefits before deciding on the subscription.

Rodeo Stampede's Ad Monetization Model

Rewarded Video Ads

Rodeo Stampede primarily uses rewarded video ads at key places in the game, such as earning coins, reviving, and boosting zoo growth.

Skippable Video Ads

Skippable video ads are also utilized, appearing when a user wants to return to the zoo after 4 sessions or retries the 5th time.

Pain Points in Rodeo Stampede

- 1 Mission Challenges**

Users are unable to skip missions, which may lead to frustration and cause them to leave the platform.
- 2 Long Tour Wait Time**

Users find the cruise wait time too long with no way to reduce it, impacting their gaming experience.
- 3 Difficulty in Achieving High Score**

Many users find it very difficult to achieve a high score, affecting their engagement with the game.

Recommendations for Optimization

1

Example 1

Pitching IAP for coin bundles at Map expansion might increase the purchase of the coin bundles, this needs to be A/B tested with new users who have never made a purchase and are at least 100 coins short of buying the next expansion.

2

Example 2

Pitching Epic Animals when a user taps on the Epic Animal habitat in the zoo, reduces one step in buying any Epic Animal and makes it more frictionless.

3

Example 3

Instead of just showing an option to view ads to get 75 coins, maybe pitch a subscription there itself highlighting the benefit of getting the animal.

Additional Ad Placements

1

Example 1

Having an ad placed to skip a mission is an easy way for gamers to skip the hard missions.

2

Example 2

Having an ad placement to reduce wait time by x minutes/hours for a cruise can enhance the user experience.

3

Example 3

Having an ad placement to get random customization for a player can add an element of surprise and engagement.

Jump over 4 obstacles in the Savannah in one run
