SUMMARY

- Dedicated Product Manager with extensive experience in B2C and gamified products, specializing in data analysis, product strategy, and roadmap planning.
- Successfully led cross-functional teams to launch high-impact projects, including a mobile game with over 50,000 downloads and improved retention rates.
- Proven track record in enhancing user engagement and optimizing product features.
- Eager to leverage expertise in product management to drive innovation and growth.

WORK EXPERIENCE

Product Manager

JetSynthesis (Game Development Services Company)

09/2025 - Present

- Owned end-to-end live operations for two consecutive seasons — managing 10 production deployments, 6 LTBs, 4 Trading Posts, and full Legendary, Mythic, Rider, and Atlas branch suites on iOS and Android.
- Identified and mitigated a \$20,000 revenue risk through impact analysis of Tower Instance configurations during a live Fortification event prize programme.
- Resolved a monetisation-critical gacha defect (missing Festive Dragon shards from Draconic Chests) affecting chest revenue — root cause identified and deployed to production without escalation.
- Designed an automated CSV batch script delivering a 45× reduction in manual processing time (15 min → 20 sec); adopted team-wide.
- Conducted structured impact analysis on a proposed XP Booster feature — identified unmitigable progression risks and recommended against implementation, preventing a disruptive release from entering the development pipeline.

Product Manager

Blkbox AI (Creative Intelligence for Mobile games)

02/2024 - 04/2025

- Built and led a cross-functional team, recruiting a developer, artist, and game designer to develop a [Free-to-Play gate runner mobile game](#).
- Spearheaded the game's development and soft-launched it within 5 months, achieving **50,000 downloads** post-launch.
- Improved player D1 retention **from 10% to 18%** within two months by refining game controls and enhancing level design for smoother gameplay.
- Collaborated with video editing and marketing teams to create high-converting ad creatives, achieving a cost per install (CPI) of **\$0.80**.
- Analyzed and optimized core loop and level design, increasing **level completion rates by 7%**.

Product Manager

AURA (Web3, Gaming NFT Marketplace)

05/2023 - 11/2023

- Implemented a sprint system and streamlined the JIRA workflow, resulting in a substantial enhancement of the tech team's operational efficiency
- Optimized the website's featured games section, leading to a **5% increase in click-through rates (CTR)** and improved user engagement
- Successfully implemented a dedicated 'Drops' page on the website, resulting in a **notable 7% increase** in user engagement time
- Conceptualized, executed, and launched the **Creator profile** on the website, empowering users to create their own NFT collections which facilitated partnerships with Galactico Manager

Product Manager

FanClash (RMG, Esports Fantasy)

04/2022 - 04/2023

- Led the organization's core pod comprising 10+ members from cross-functional domains
- Revamped team creation flow to increase **conversion rate by 5%**
- Leveraged partnerships with Esport teams to develop and launch a feature called Fantasy With EStars to achieve an average of **90% fill rate**
- Performed extensive user research to improve engagement of boosters, resulting in a **10% increase** in usage
- Analyzed user data to pinpoint areas for improvement, resulting in a **15% increase** in the adoption of Expert Opinion and Player Stats.

Game Product Manager

Playshifu (EdTech, Stem-based AR toys)

06/2021 – 03/2022

- Took sole responsibility for the full product/game lifecycle, from writing specifications, and working across multi-disciplinary teams: design, art, and engineering to **launch 3 games in 6 months**
- Led efforts in analyzing the Tacto Electronics Game to diagnose drop-offs, successfully increasing the level completion rate by 5%
- Developed a MixPanel dashboard with funnels for the Tacto Electronics Game, enabling detailed analysis of drop-offs and strategies to increase level completion rates
- Created a comprehensive Product Requirement Document for various features of the Plugo Animals game, ensuring clear communication and alignment among teams
- Partnered with different product managers on feature-related project priorities, milestones, and delivery dates

Senior Software Engineer

SplashLearn (EdTech, App-based learning)

07/2019 - 06/2021

- Designed, developed, and launched English games on Android/iOS/Web
- Partnered with the project manager on feature-related project priorities, milestones, and delivery dates
- Increased engagement by 60% with the development of the English Curriculum across multiple platforms
- Executed and implemented MathFacts that enhanced the user experience

Software Engineer

Suventure Services Pvt Ltd.(Service-based, Finland-based Client)

07/2018 - 07/2019

- Built features of an indoor cycle training application
- Contributed to the development of a Bluetooth Feature that improved user experience
- Developed Nearby Players List that increased **user engagement by 5%**

Game Developer

Nukebox Studios (F2P, Mobile Games Studio)

12/2014 - 06/2018

- Designed and developed architecture for Editor's Choice Game: **Food Truck Chef**
- Led the development of **Food Truck Chef** on Facebook GameRoom
- Utilized player feedback and competitive analysis for game improvements.
