

Wizard Of Oz Case Study

Increase in-game revenue from existing users by 5% for the game Wizard Of Oz Magic Match

 by Rahul Ohri

Understanding the Audience

Competitive Players

- Invest to dominate.
- Heavy spenders seeking competitive advantage

Engaged Players

- Purchase to accelerate progress.
- Regular buyers of boosters and bundles

Casual Players

- Spend on minor boosts.
- Rare spenders; may buy extra lives during tough levels

Our IAP strategies cater to these three key audience segments.

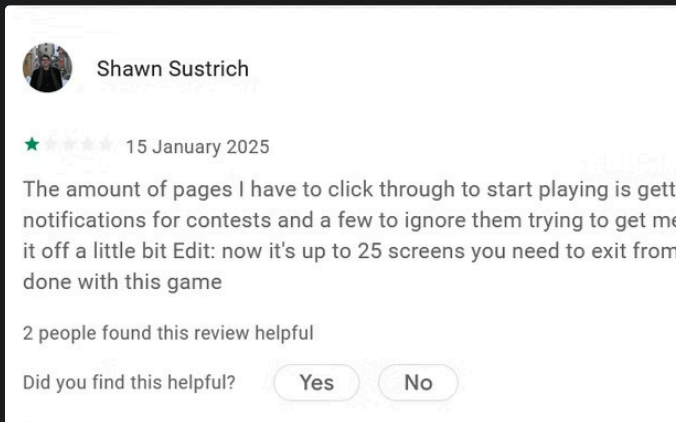

Existing Monetization Strategies in Wizard of Oz Magic Match

The game already leverages several common monetization strategies:

1. **Social Leaderboard:** Emerald City Championship
2. **Daily Bonus**
3. **VIP Program**
4. **Season Pass:** Wicked Season Pass
5. **Welcome Pack**
6. **Starter Pack**
7. **Leaderboard with maximum 10 users:** Balloon Race
8. **Coin Vault**
9. **Option to buy lives using hard currency**
10. **Making any purchase removes all unwanted ads**

We will focus on addressing **pain points** of current users, assuming that churn rate is causing lower ARPU.

Key Pain Points

Shawn Sustrich

★☆☆☆☆ 15 January 2025

The amount of pages I have to click through to start playing is getting annoying. I have to click through notifications for contests and a few to ignore them trying to get me to do it off a little bit Edit: now it's up to 25 screens you need to exit from before you can do anything done with this game

Frequent Pop-ups

Intrusive ads cause frustration.

Steve Farris

★☆☆☆☆ 30 January 2025

Game is a total joke. Sluggish play, powerups w board. Lives can get down right sparse. I do remember with all games, they let greed get in the way, instead of fun

Difficulty Spikes

Unfair without extra purchases.

Linda Owings

★☆☆☆☆ 31 January 2025

This game use to be fun now I'm extremely disappointed I have to pay money for my rewards! This is not fair also the Player Support is useless,by the time they decided to fix the game it was too late

Pay to Play

Game feels more like Pay to Play vs Free to Play

Addressing Launch Time and Pop-ups Issue

Pain Point

Frequent Pop-ups & Intrusive Ads causing frustration and increasing app launch time to over a minute. Regular players are likely to churn due to this, impacting retention and revenue.

Solution

Implement a smarter pop-up system that prioritizes pop-ups based on event expiry and user engagement patterns, reducing unnecessary interruptions.

Revenue Impact Forecast:

According to industry data from **Adjust** and **GameAnalytics**, reducing app load times by 10-15 seconds has shown to improve retention rates by **5-10%** and increase IAP revenue by **2-3%** over time. Faster launch times reduce friction for regular players, ensuring they return more frequently and stay engaged longer.

Addressing Pay to Play

Emerald Road Adventure

- A progression-based event with milestone rewards.
- Currently there are no incentives to complete chapters
- Adding incentives directly into the core gameplay loop ensures players feel consistently rewarded, increasing engagement time and indirectly driving revenue.

Revenue Impact Forecast

According to **GameAnalytics**, implementing core loop incentives has shown to increase engagement rates by **10-15%**, which in turn drives **2-3% revenue growth** by increasing session duration and repeat purchases.

Introducing Streak System for Increased Engagement

Why It Will Work

- **Streak systems** create a strong psychological incentive for players to continue winning to maintain their streak. Players will be more inclined to spend on boosters or extra moves to avoid losing the streak.

Proposed Streak Formats

- **5-Level Streak:** Consecutive wins across 5 levels unlock power-ups, in-game currency, and boosters.
- **7-Level Streak:** Provides escalating rewards including unique cosmetic items, event-exclusive power-ups, and leaderboard bonuses.

Revenue Impact Forecast

Based on insights from **Playliner** and **GameAnalytics**, implementing streak systems has led to a **3-5% increase in revenue** by driving booster purchases and improving player retention.

Impact Calculation For Streak Feature

We are given:

- Total Downloads = 10M **(From SensorTower)**
- D30 Retention Rate = 5% (As per industry benchmarks for match 3 games)
- **MAU = 500,000 users (Total Downloads * D30 Retention)**
- **Current Monthly Revenue = \$200,000 (From SensorTower)**
- ARPPU = \$8 (Assumption based on benchmark for match 3 games)
- **Total Paying Users (IAP Conversion Rate) = Total Revenue ÷ ARPPU**
- **New ARPU after streak system = \$8.08** (Assumed +1% increase from feature implementation)

Impact (+0.1% Increase in Conversion Rate (Assumption), ARPPU = \$8.08)

- **New IAP Conversion Rate = 5% + 0.1% = 5.1%**
- **New Paying Users = (MAU * New IAP Conversion Rate) = 500K MAU x 5.1% = 25,500**
- **New Monthly Revenue = (New Paying Users * ARPPU) = 25,500 users x \$8.08 = \$206,040**
- **Incremental Revenue = (New Monthly Revenue - Current Monthly Revenue) = \$206,040 - \$200,000 = +\$6,040/month (+3.02%)**

Forecasting IAP Growth

Strategy	Estimated Growth Impact	Assumptions
Improved Launch Time	+1.5-2%	Faster launch improves retention and repeat sessions
Core Loop Incentives	+1.5-2%	Rewards for continued engagement increases session duration and repeat purchases.
Streak System	+2-3%	Players will be more inclined to spend on boosters or extra moves to avoid losing the streak.

driven by Streak Systems

Conclusion

By focusing on improving key friction points like **app launch time** and enhancing gameplay with **Core Loop Incentives** and **Streak Systems**, Wizard of Oz Magic Match can deliver sustained revenue growth. These solutions directly address pain points cited by existing players and leverage proven monetization strategies from top-performing games. Combined, these initiatives are forecasted to increase in-game revenue by **5%** while improving retention and user experience.
